SUBJECT: BLM fire response resources in Nye County

SUMMARY

The Las Vegas Field Office of the Bureau of Land Management provides wild-land fire suppression services to all of the lands within Nye County that are managed by BLM.

The fire suppression resources for wild-land fires are seasonally available (generally from April through October). These resources include:

- 4 Type-3 wild-land fire engines
- 1 Type-3 helicopter
- 18 firefighters on the engines
- 9 firefighters on the helicopter
- 3 instant commanders

There is a dispatch center in Las Vegas that coordinates the fire response.

Through a formal agreement, the Las Vegas Field Office also responds to fires on lands managed by the Department of Energy in Nye County, including the Nevada Test Site, and the Department of Defense.
